Corporate Statement

We are poised to provide our clients with consistent quality, cost-effective service delivery and better living for all.

SAMA & VICBAY LIMITED

ENGINEERING & CONSTRUCTION

About Us

Sama & Vicbay Limited is a Construction and Engineering firm based in Lagos, Nigeria. We offer complete led design, engineering, construction and procurement services. From initial feasibility studies, concept design, planning applications and building regulations applications through to tender negotiations, contract administration, project management and ultimately on-site completion certification.

In the area of Construction Services, the company have been providing clients with reliable solutions to their most complex construction challenges. Today, we are reputed for our strength in traditional construction methods and for our creative, fresh approach to cutting edge technologies and delivery systems.

Our expertise spans the construction industry spectrum, from smaller renovations and rehabilitation to multi-million naira projects. We specialize in road construction, industrial facilities, real estate development, institutional and educational buildings, telecommunications and data centers, as well as infrastructure projects.

About Us

Our success is driven by more than building some of the most advanced facilities for our corporate, institutional, government and individual clients. More and more of our clients are turning to us for our distinctive ability to implement innovative project management techniques and to serve as a reliable provider of knowledge-driven solutions for their complex construction projects.

Our team of construction professionals offers a single source solution for all construction related needs. Whether it's restoration, site preparation, a new facility or facility renovation, road construction or rehabilitation, we have the experience and personnel to provide the highest quality construction on schedule and within budget.

We support our clients from project inception, to the commissioning of the fully operational facility. And our network of local offices enables us to offer our clients the dual advantage of a strong local presence and broad geographic reach.

Engineering

Services

We specialize in Consultancy, design, Building and Renovation/ Refurbishment of several building types. Providing high quality and efficient professional services to diverse and discerning Clients.

We are dedicated to high quality professional engineering services with specialization in Building and Civil Engineering, Building Construction Works and General Engineering Services including Planning, Designing, Installation, Repairs, Alterations, Maintenance and Demolition of Construction Works services.

We have competent and highly qualified professional staff well trained in the various fields of our operation to execute projects to standard and specifications. Through perseverance, dint of hard work and uncompromising standards we continue to offer excellent services/workmanship second to none anywhere to our numerous clients-individual and corporate bodies, both international and local.

Sama & Vicbay also specializes in road construction and rehabilitation. While the company's core focus is major national and provincial arterial roads and urban highways, its expertise extends to urban infrastructure and select industrial, commercial, residential and sporting building projects. The company has strong vertical integration with crushing and concrete work operations to support its roadwork activities.

Our core area of specialization are;

- Engineering
- Procurement
- Construction
- Design/build
- Project management
- Operations and maintenance
- Logistics management and support

Strategic

Partnering

As a Strategic Construction Partners, we operate as an extension of our client's own staff, overseeing both project construction and facilities management. Within this role, we create a "construction program" in which we manage design review, budgeting, scheduling, quality control, safety, and security, as well as any other client requested items. This project delivery method is best suited for an organization with multiple projects or facilities because it provides a consistent, measurable program through every phase of the construction process which can be extended to any location or facility.

Our philosophy recognizes that the construction industry is heavily dependent on people and encourages independence and personal responsibility amongst staff. With this in mind, we have setup processes to ensuring that all employees are afforded equal opportunities in the fields of training, career guidance, mentoring and employee benefits. Our focus remains on being fiercely competitive and innovative to offering our clients superior personal service and our employees a thriving culture that recognizes and reward independent initiative. We intend to maintain the our leadership in the market through structured organic growth for which the ongoing skills training and upliftment of all employees are critical

Our Team

The Board of Directors, have put together a strong management team of professionals with vast experience in construction and related technical matters that can deliver quality work.

Our core team of professionals are made up of Building and Road Construction Engineers with vast experience working with both State, Federal and Private establishments.

Our workforce ranges between 200 and 350 and we can mobilize to site very quickly. The company has the full compliment of experienced administrative and information technology staff. Added to that is the support provided by the logistics, human resources, accounting, legal and quality management personnel.
